Mr. Edlund,

To the best of my knowledge, Arkema has provided all information requested by Mr Bernier. If additional information is required, there are Arkema team members located at the Command Center where Mr. Bernier is located. He has access to that team for information. I am also available to Mr Bernier as needs arise.

King of Prussia, PA 19406

Dear Ms. Cencetti,

Thank you for agreeing in our 5:00 pm call today to provide the Environmental Protection Agency (EPA) with the information in our ongoing request related to site hazards listed below. Thus far EPA has been neither able to perform an accurate nor complete model of worst-case environmental impacts due to the lack of this information. Time is of the essence to perform the modeling in advance of any major explosive event. We will work as quickly as possible to produce a model that can be used to evaluate potential safety of responders and the local community. Information

is needed regarding:

1. SO2 containers, their storage location in proximity to the Isobutylene container and 6 containers with organic peroxides
2. Concentrations, quantities and MSDS's of other chemicals of concern (flammable, combustible, high concentration acids, etc), TSCA and FIFRA products presence on Arkema's territory
3. Any other information that may be important/valuable for modeling chemical releases and fires

We also request that Arkema make its technical experts immediately available to assess the safety of the current situation. Please work with OSC Roberto Bernier to respond to these requests.

Sincerely,

Carl Edlund
